**\*Planning Time Index, PTI**, is a measure of reliability and the ratio of the 95th percentile travel time to the free-flow travel time. For example, travelers making this trip are on time 95 percent of trips (e.g., late for work on one day per month). A PTI of 1.60 indicates a 20-minute free-flow trip takes more than 32 minutes ( $20 \times 1.60$ ) one day per month.
