

Transportation Systems Management and Operations (TSMO): Getting More from Our Existing System

Expanding Travel Choices to Move More People

49% of shared electric scooter
and bicycle trips replaced
single-occupant vehicles.¹

80% of people using express
lanes in peak hours were
riding on buses or carpooling.²

Making Travel Times More Reliable

Increased travel time
reliability accounted
for 68% of the
benefits of using
congestion-priced lanes.⁶

Dynamic late lane
merging in work zones
reduced delays by 67%.⁷

Truck parking and management
systems reduced parking search time
with a benefit-cost ratio of 4:1.⁸

Keeping Lanes Open Increases the Value of Investments

Improving Travel Time without Increasing Capacity

Regional signal retiming
reduced delays by 23%.⁹

Adaptive signal control
reduced travel time by 9.4%.¹⁰

Active Transportation
Management Systems may
reduce peak period travel
times by up to 21%.¹¹
